

**Control Configurator MS and the GSM Library
unite to form a powerful combination**

**In just a few minutes, set up a powerful GSM alarm notification system
that fulfils all your individual needs!**

- **Control Configurator MS software
and the GSM library for FPWIN Pro in one product**
- **Expand as needed with your own PLC programmes**
- **Supports up to 28 inputs and 28 outputs of your PLC**
- **For all FP-Series PLCs with a COM port:
FP0, FP-e, FP-Sigma, FP-X, FP2**
- **Also supports the FP2 MCU (Multi-Communication Unit)**
- **Supports various GSM modems: TC35(i), MC35(i), Wavecom WMOD2, Dr.
Neuhaus/Sagem GMOD-S1/S2**
- **Example FPWIN Pro programmes with extensive comments**

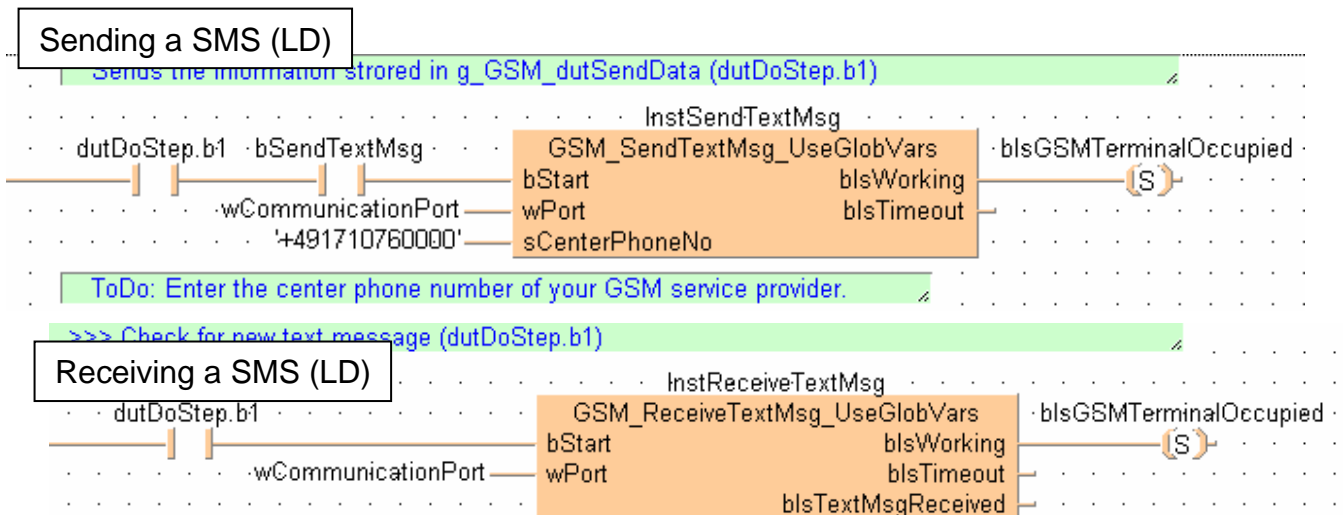

Control Configurator MS software:

- **Send SMS (Short Messages) via GSM mobile phone nets
to up to 4 mobile phones**
- **No programming skills necessary!**

The most important features:

- Send short text messages (SMS), faxes or e-mails, initiated when the status of the digital input signal changes, delayed if desired
- Set up and load a programme with intuitive software, i.e. no programming necessary; everything is ready to go
- Short text messages can be sent to up to 4 telephone numbers.
- Short text messages can be sent to one or more telephone numbers simultaneously.
- Acknowledge short text messages: If a short text message is not acknowledged within the time you specify, the system can send existing alarms to other telephone numbers.
- Station name is transmitted along with each short text message
- Up to 28 outputs can be turned on and off with one short text message; the PLC can acknowledge with a short text message
- Prepaid card's available credit can be monitored
- Status inquiries via short text message
- Change telephone numbers via short text message (with password)
